Cessna Citation CJ2

The Citation CJ2, Model 525A, is an upgrade of the Citation CJ1, and was first delivered in 2000. It has a stretched cabin and wingspan along with increased speed, range and payload capacity. Powered by two Williams-Rolls FJ44-2C turbofan engines, each offering 2,400 lb of thrust, the CJ2 can be single pilot operated and can take off in 3,420 ft at sea level, or in 5,080 ft on a runway at an altitude of 5,000 ft. The first CJ2 delivery took place in 2000.

The newer CJ2+ has updated avionics, increased performance and FADEC controls and is powered by two Williams-Rolls FJ44-3A-24 engines. The FAA granted type certification on 3 October, 2005 and the first CJ2+ was delivered in April 2006.

This Index is just the tip of the iceberg

Over 400 aircraft types are analysed on the Business Air News Handbook website, and in our printed annual Handbooks

Plus there is comprehensive coverage of over 9,500 airports worldwide, and over 8,000 FBOs and handlers. There is a full calendar of important events, our excellent charter trip planner, and everything is fully cross-referenced and indexed for simple and effective reference.

A subscription for full and unlimited access is just £225.
