Challenger 604

The Challenger 604 intercontinental business jet can accommodate up to nine passengers in business-class seats. It is a major upgrade of the 601 design, and a longer range derivative of the 601-3R, with a range of 4,077nm and a long range cruise speed of 787km/h.

The Challenger 604 prototype was modified on the production line from the 601-3R. It took its first flight with CF34-3A engines on 18 September, 1994, and a first flight with the more advanced CF34-3B engines on 17 March, 1995. It offers increased fuel capacity with saddle tanks to the rear, a new undercarriage for a higher take off and landing weight, it has a super-critical wing and structural improvements were made to the tail.

Transport Canada granted certification on 20 September, 1995 and the FAA on 2 November that same year. Deliveries began in 1995.

From June 2001, the aircraft have been delivered with upgraded PrecisionPlus Collins Pro Line 4 avionics.

Production ended in 2006, with a total of 365 jets built, the last delivered on 25 April, 2007.

This Index is just the tip of the iceberg

Over 400 aircraft types are analysed on the Business Air News Handbook website, and in our printed annual Handbooks

Plus there is comprehensive coverage of over 9,500 airports worldwide, and over 8,000 FBOs and handlers. There is a full calendar of important events, our excellent charter trip planner, and everything is fully cross-referenced and indexed for simple and effective reference.

A subscription for full and unlimited access is just £225.
