Global 5000

Canada-headquartered manufacturer Bombardier designed the Global 5000 to be a high speed business aircraft with a 14 hours endurance. It has steep approach certification and can fly non stop from Aspen, Colorado to London City airport, with access to luggage while in the air.

Slightly shorter than the original Global Express, the Global 5000 was announced on 25 October, 2001 and launched on 5 February, 2002. The first aircraft flew on 7 March, 2003 and entry into service followed in April 2005. The Global 5000 is powered by Rolls-Royce BR710A2-20 turbofans with a thrust of 14,750 lbf, and was designed to take eight passengers and a crew of three 8,900km at 0.85 mach. It has a maximum operating altitude of 51,000 ft and initial cruise altitude of 41,000 ft.

The aircraft is developed from the Challenger 600 and the CRJ-100/-200, in terms of fuselage cross-section, and is paired with a T-tail and flexible wing. Bombardier unveiled the 5,700 nm Global 5500 in 2018. Benefitting from a redesigned wing and cabin, the 5500 features Rolls-Royce Pearl powerplants, designed to be cleaner, more efficient and improve upon the range of their predecessors by up to 1,300 nm. From October 2019 the range of the Global 5500 was increased to 5,900nm, and the first example entered service in mid-2020.

This Index is just the tip of the iceberg

Over 400 aircraft types are analysed on the Business Air News Handbook website, and in our printed annual Handbooks

Plus there is comprehensive coverage of over 9,500 airports worldwide, and over 8,000 FBOs and handlers. There is a full calendar of important events, our excellent charter trip planner, and everything is fully cross-referenced and indexed for simple and effective reference.

A subscription for full and unlimited access is just £225.
